## The Tools and Teamwork of Risk Stratified Care Management

# Solutions Center Interactive Team

Karen K. York, MA, CPHQ, CPMSM, Solutions Center Consultant, HealthTeamWorks  
Karen York is a healthcare consultant with more than 30 years of experience in a variety of healthcare settings, including hospitals, emergency physician groups, physician practices, medical plans, and hospice care. She is a skilled facilitator and has led organizations to better outcomes. Karen is certified in the areas of Healthcare Quality Improvement, Medical Staff Services, Clinical Healthcare Coaching, and Lean Healthcare Management. She is currently an Adjunct Faculty in the Healthcare MBA Program at Belmont University teaching Patient Centered Care and Healthcare Quality Improvement. Karen earned her Master of Arts degree in Organizational Leadership and holds a BA in Education.

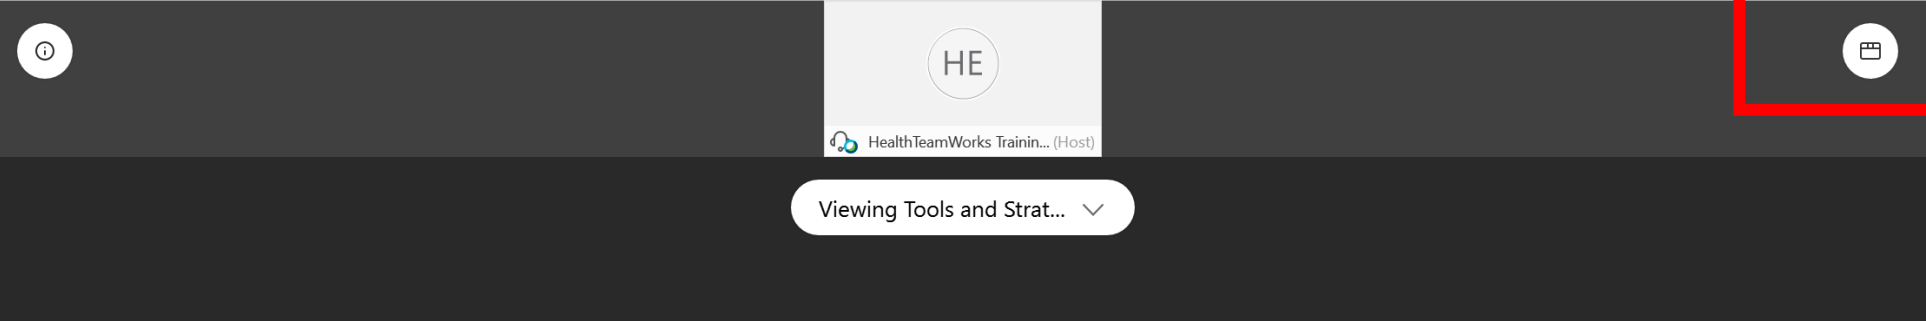

Heather Walker, Learning Experience Designer – HealthTeamWorks

Heather has earned certificates in Designing Learning and Evaluating Learning Impact as well as the designation of Master Instructional Designer from the Association for Talent Development. At present, Heather is pursuing a Master's of Science in Information and Learning Technology with an emphasis in Instructional Design and Adult Learning from the University of Colorado Denver.

# Where are you?

# Your Interaction is Rewarded!

We are giving away 5 complimentary 1-year Individual memberships to the Solutions Center

Every time you participate in today's event, you will receive an entry into a drawing for 1 of 5 memberships.

**Participate through Chat = 1 entry**

**Use Raise Hand feature and speak to the group = 2 entries**

The screenshot shows the 'SOLUTIONS CENTER' page with the tagline 'Your Go-To for How-To'. Below the header is a descriptive paragraph: 'A platform to convene a member-community of like-minded individuals for collaborative learning and innovation to advance healthcare transformation. As a Solutions Center member, you are a learner, a teacher, an innovator, and a leader. Join us on our journey to healthier communities.' The page is divided into three main sections: 'LIBRARY' featuring 'ON-DEMAND GUIDES, TOOLS & RESOURCES', 'SCHOOL' featuring 'LIVE VIRTUAL WEB EVENTS & ON-DEMAND LEARNING MODULES', and 'OFFICE' featuring 'VIRTUAL COLLABORATIVE WORKSPACE & PEER DISCUSSION FORUM'. A 'MEMBERSHIP' section at the bottom right contains two blue buttons: 'Learn More About Becoming a Member' and 'Join Now'.

*\*Winners will be announced via email after the event.*

# Solutions Center Interactive Team

Moderator: Kristi Bohling-DaMetz, RN, BSN, MBA, Chief Strategy Officer -  
HealthTeamWorks

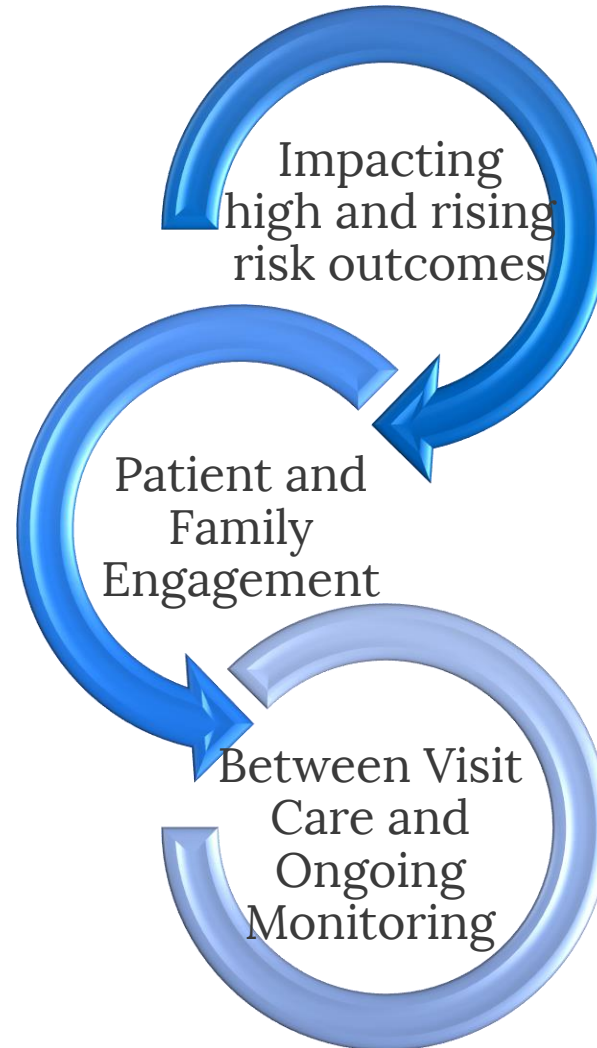

Kristi comes to HealthTeamWorks with more than 20 years of healthcare delivery, training, and transformation experience. Previously, Kristi was Program Director at TransforMED for CMMI's Patient-Centered Medical Neighborhood Health Care Innovation Award. She led a team to improve outcomes related to quality, cost savings, patient experience, and scalability across 15 health systems and communities. Kristi received her Bachelors of Science in Nursing from Wichita State University and her MBA from Friends University.

Panelist: Lori Lahrman-O'Hearn, RN, BSN, Healthcare Learning Faculty -  
HealthTeamWorks

Lori joins HealthTeamWorks with thirteen years' experience in the healthcare industry, with a focus in care coordination, practice transformation, and population health. Her strategic vision informs and guides every aspect of her work, whether she's developing and implementing new clinical programs or leading a team through significant change. Lori holds a diploma in nursing from The Christ Hospital School of Nursing, and a Bachelor of Science in Nursing from the Wright State University in Dayton, Ohio.

# Importance of Effective Care Management

# Question for the Learning Community...

**Participants, please use the following options to respond:**

- **Chat feature** (make sure your chat is set to “all participants”), or
- **‘Raise your hand’ feature** if you prefer to open the phone line to share your response.

*What are the two greatest impacts of care management you've experienced in your organization?*

# Evolution of the Care Manager Role

**Measurable Impact**

**Various Roles & Functions**

**Multiple Titles**

**Combined Job Descriptions**

**Workforce Training Gaps**

**Engagement and Coaching**

*Defined Critical Skill Sets*

# Considerations for Program Development

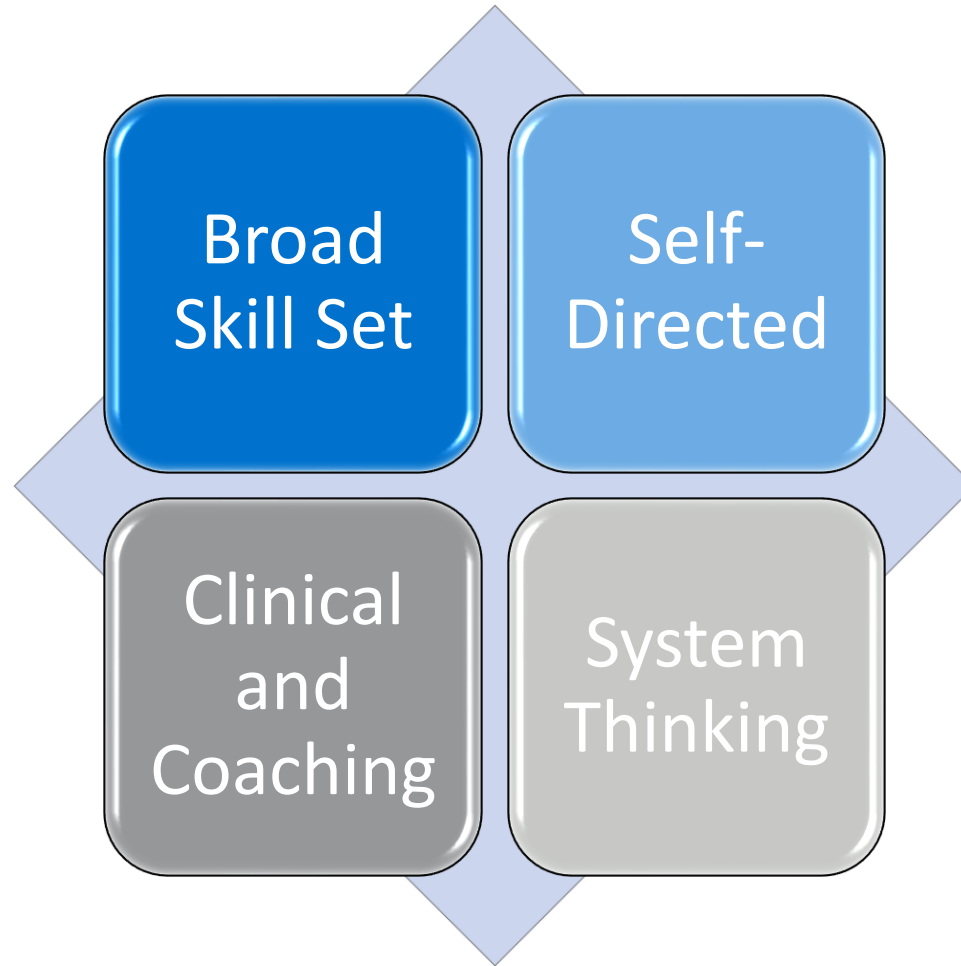

# Question for the Learning Community...

**Participants, please use the following options to respond:**

- **Chat feature** (make sure your chat is set to “all participants”), or
- **‘Raise your hand’ feature** if you prefer to open the phone line to share your response.

*What tools have you used to define the role of your Care Managers?*

# Considerations for Hiring Exceptional Care Managers

# Hiring Exceptional Care Managers

## Assess ability to understand basic concepts of population health and disease management

### • Risk stratification

- Share an example of the risk stratification algorithm used at your practice
- Pull together a list of 10-15 (deidentified) patients with risk score and several key clinical data points (diagnoses, psychosocial factors, lab results) *Be sure to include a variety of patients with different risk levels and clinical/psychosocial factors*
- Have the candidate talk through which patients they would consider enrolling in care management

***Purpose of this exercise:** To assess candidate's ability to collect multiple pieces of data, integrate the information, and critically think through which patients might benefit from a care management intervention and why other patients might not benefit.*

### • Managing a diabetes (or other chronic disease) registry

- Share a copy of your protocol for management of diabetes
- Pull together a list of 5-10 (deidentified) patients from the diabetes registry.
  - Include risk score, most recent Hgb A1c and date completed, recency of DM education with a dietitian or DM educator, other pertinent factors
- Have the candidate talk through a very basic plan for each patient, based upon your protocol for diabetes management

## Assess proficiency in Microsoft Excel

- **Create a blood sugar log in Microsoft Excel:** Candidate will complete this as homework, before the interview
  - Provide a list of pretend blood sugar results to the candidate (Include date/time of result and value)
  - Candidate will create an excel spreadsheet template for a blood sugar log and complete the following:
    - Enter the blood sugar results from the sample provided
    - Average the results in the way that they believe will be most useful for the practitioner
    - Email the completed spreadsheet to interview panel lead (this is critical – a paper copy of the spreadsheet will not allow you to assess use of formulas)
  - At the time of interview, ask candidate to talk about their process in developing the spreadsheet

## Assess understanding of key concepts in collaborating with patients

- **Teach Back:** Ask candidate to role play with one of the interviewing panelists, using teach back on any medical/clinical concept of their choice
- **Motivational Interviewing:** Ask candidate to describe what motivational interviewing is and give an example of how they have used this technique with a patient/caregiver

***Purpose of exercise:** Skill in these areas is critical to working with patients and helping them make progress toward goals for self-management. The RN Care Manager should demonstrate at least a moderate level of skill and understanding of the importance of meeting patients where they are. This includes letting go of the 'prescriptive' way of telling patients what to do, and using techniques to explore individual motivation to make positive change.*

## Assess ability to lead a care team (team may include LPN's, MA's Community Health Workers, Health Coaches)

- **Use behavioral based question(s). Some examples are:**
  - Care Management is a relatively new concept in primary care. Some of the staff in the practice may struggle with accepting this role, and may challenge you in different ways. What strategies might you employ if a staff member creates roadblocks to your integrating into the practice culture?
  - You are working in a practice with four providers. Three of these providers are excited about the addition of Care Management, and one is not. What strategies would you try to gain buy-in with the provider that is not interested in having his patients care managed?

Open to the Public

# Characteristics of Risk Stratified Care Management

Based on multiple criteria (clinical, behavioral, social)

Identifies patients who would most benefit from additional care management support (high and rising risk)

Includes care team's ability to upgrade or downgrade risk

## Risk Stratification Tool

# Risk Stratification Algorithm

Category	Item	Points
Utilization	One hospitalization in the last 12 months	1
	Two hospitalizations in the last 12 months	2
	Three or more hospitalizations in the last 12 months	3
	2 or more visits to ED in the last 6 months	3
Age	0 – 49 years old	0
	50 – 59 years old	1
	60 – 69 years old	2
	70 and older	3
Health Conditions (any history of)	CAD	1
	CHF	1
	MI	1
	Atrial Fibrillation	1
	Peripheral Vascular Disease	1
	HTN	1
	Hyperlipidemia	1
	CVA	1
	Dementia	1
	BMI 30 or higher	1
	COPD	1
	Asthma	1
	Mild liver disease	1
	DM w/o end organ damage	1
	DM w/ end organ damage	2
	Hemiplegia	1
	CKD stage 3-4 (moderate to severe)	2
	Any tumor (without metastasis)	2
	Leukemia	2
	Lymphoma	2
Moderate or severe liver disease	3	
AIDS (not just HIV positive)	6	
Metastatic solid tumor	6	
Mental Health*	Depression	1
	Anxiety	1
Behavioral	Current Smoker	1

**\*\* to score any points, the mental health issue must be concurrent with at least two of the listed chronic conditions**

### Risk Tiers, based upon tallied score:

Low Risk	0 – 6 points
Medium Risk	7 – 12 points
High Risk	13 or higher

# Question for the Learning Community...

**Participants, please use the following options to respond:**

- **Chat feature** (make sure your chat is set to “all participants”), or
- **‘Raise your hand’ feature** if you prefer to open the phone line to share your response.

*What is your approach to risk stratification?*

*How do your Care Managers determine which patients need additional support?*

# Evidence-Based Protocol Example

## 2018 Diabetes Care Guidelines

Clinical Goals								
Glycemic Goal <sup>1</sup>			Blood Pressure Goal <sup>4</sup>		Premeal Glucose Targets <sup>1</sup>			
HgbA <sub>1</sub> C	≤ 7%	For most diabetics	<130/80		80-120 mg/dL			
	< 8%	For h/o severe hypoglycemia, advanced age, advanced micro &/or macro vascular complications, extensive comorbid conditions & long-standing DM when goal difficult to attain despite DSME						
Standards of Care								
Office Visit Frequency		Lab Work			Screenings		Medications	
Condition	Schedule	Indicator	Level	Schedule	Type	Schedule	Type	Prescribed if:
Hospitalized	3-5 days post discharge	HgbA <sub>1</sub> C <sup>1</sup>	>7.0%, or not meeting goal	Every 3 mos	Tobacco Abuse <sup>2</sup>	Every Visit	Statins <sup>2</sup>	Treatment driven by risk status (See Table on reverse side of this document)
Treatment goals NOT being met <sup>3</sup>	Every 3 mos	Consider fasting plasma glucose test or oral glucose tolerance test if there is disagreement between A1C and blood glucose levels <sup>2</sup>	<7.0%, or meeting goal	Every 6 mos	*offer pharmacological therapy if patient is interested in quitting. e-cigarettes = not supported as alternative or to facilitate cessation <sup>11</sup>	Every Visit	empagliflozin or liraglutide <sup>3</sup>	Consider if known cardiovascular disease
Treatment Goals ARE being met <sup>3</sup>	Every 6 mos	Lipid profile <sup>3</sup>		If not performed or available within past 12 months; as needed	Eye Exam <sup>3</sup>	Type 1 (≥5 years) & Type 2 - Every 2 years if normal	Ace Inhibitor <sup>2</sup>	In cases of known CVD
Education		Spot urinary albumin-to-creatinine ratio <sup>3</sup>		Every 12 mos	PHQ-2 <sup>1</sup>	Every 12 mos	ACEI, ARB, Thiazide-like diuretic or dihydropyridine calcium channel blocker <sup>3</sup>	HTN and negative albuminuria
Home blood pressure monitoring <sup>5</sup>		Serum Creatinine & estimated GFR <sup>1</sup>		Every 12 mos	Neuropathy <sup>3</sup>	DM Type 1 (≥5 years) & DM Type 2 - Annually		
Monitoring carbohydrate intake <sup>1</sup>		Serum Potassium (if on ACE, ARB or diuretic) <sup>1</sup>		Every 12 mos	Sleep patterns <sup>3</sup>	Each visit		
Medication administration (insulin or oral meds) <sup>1</sup>		ALT <sup>1</sup>		Every 12 months	Foot Exam <sup>1</sup>	Normal-annual; Abnormal-each visit	ACEI or ARB (only in the non-pregnant patient) <sup>3</sup>	Recommended if urinary albumin 30-299 mg/g; Strongly recommended if urinary albumin ≥300 mg/g
Blood glucose monitoring <sup>1</sup>		B12 Level (if on long term metformin therapy) <sup>2</sup>		As needed	Corn orbitis <sup>3</sup>	Each visit		
Limit alcohol consumption <sup>1</sup>		Thyroid Stimulating Hormone (TSH) - Type 1 diabetics		Every 12 months	Psychosocial determinants <sup>3</sup> & literacy	Annually & prn		
Proper foot care, surveillance, protection (especially if has abnormal foot exam) <sup>1</sup>					Cardiovascular risk factors <sup>3</sup>	At least annually	Aspirin or clopidogrel (if known ASA allergy) <sup>3</sup>	Known ASCVD (if not contraindicated); increased CV risk
Exercise <sup>1</sup>					Referrals			
Smoking cessation <sup>1</sup>					Type	Explanation		
Weight loss/Weight Management <sup>3</sup>		Endocrinology			Consider referral if diabetic complications present; All individuals with Type 1 Diabetes; patients with HgbA <sub>1</sub> C >8 x2 consecutive tests			
Immunizations		Podiatry <sup>3</sup>			History of smoking, lower extremity complications, loss of protective sensation			
Per CDC Guidelines		Nephrology			GFR < 60, anemia, metabolic bone disease, or etiology of kidney disease uncertain			
		Registered Dietitian <sup>20</sup>			For Medical Nutrition Therapy-ALL diabetics (as often as needed to achieve treatment goals)			
		Certified Diabetic Educator <sup>21</sup>			For diabetes self management education - group or individual sessions; referral annually for ALL diabetics not meeting A1C goal			
		Maternal-Fetal			All diabetic mothers			
	Nurse Navigator <sup>2</sup>				If HgbA <sub>1</sub> C persistently elevated (>9.0%) after 12 months of intervention; any noted social determinants

membership](https://www.healthteamworks.org/membership)

Join the Community!

### SOLUTIONS CENTER MEMBERSHIP

Join the Community

HealthTeamWorks® Solutions Center is a collaborative learning community for sharing and creating healthcare transformation solutions. As a member of the Solutions Center, you can collaborate with your peers across the country to contribute to the further development and refinement of member tools and resources. To support this effort, we've created three spaces:

#### The Library

Check out the Resource Library to find helpful tools, test and validate existing materials, and identify additional resources to be added.

#### The School

Attend "class" by enrolling in Solutions Center Interactive events to engage in roundtable discussions, learn from expert panels, and share your experiences with the panel and your peers.

#### The Office

Create or join a collaborative workspace and engage with other members of the community to innovate and develop new tools, workflows, templates, and interventions.

With topics focused on Advanced Primary Care as well as Business Operations, Financial Performance, Data Analytics, Quality Improvement Technology Optimization, and NCQA Recognition Support, the Solutions Center has something for everyone in your practice, hospital, or network.

Our members are care managers, physicians, directors, administrators, practice managers, and healthcare executives. You can join as an individual or as a group. Whether your focus is on professional development, resources and education for the team, or developing a network for collaborative problem solving and idea generation, we have a membership level that best fits your needs.
